Gas Warning

City Is On Best Line To Alaska

Edmonton is on the most practical line of flight from the central headquarters area of the United States Air Corps to the rapidly extending defensive base system in strategic Alaska, officers in charge of an inspection party arriving in Edmonton Thursday afternoon stated.

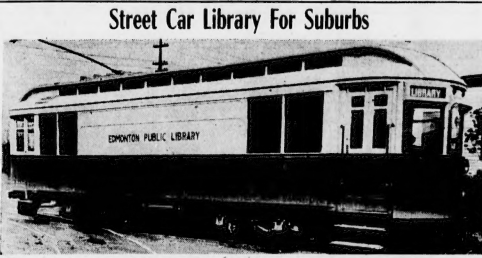

The party of six, flying in a big Douglas 18A all-metal medium bomber, arrived at Edmonton airport at 12:40 p.m. from Saskatoon. The plane left Washington, D.C., Monday.

Heading the party are Col. M. E. Douglas, chief of the division of the U.S. Army Air Corps, and Lt. Col. E. W. Hill, inspector of the U.S. Army air forces.

The officers were greeted at the airport by Capt. James Bell, airport manager, and P.O. Tex Mitchell, chief pilot with R.C.A.F. Here, officers in the party are Maj. W. H. Lawson, flight surgeon; Capt. M. A. Libby, staff inspector of U.S. Army air forces; Sgt. A. C. Cole, radio operator and Staff Sgt. R. B. Moore, aerial engineer.

The White House shared public opinion that the city and the battle of the air forces and the U.S. Army officers and leaders, including the U.S. Army Air Corps, are in the city.

The two officers said they were continuing on Page 2, Col. 2.

Street Car Library For Suburbs

First of its kind in the Dominion, Edmonton's street-car library, shown above, will be placed on display at the corner of Jasper and 101 street on Friday morning. It will be officially opened to the public at 8 p.m. Friday by Mayor John W. Fry. Plans are to have it stationed alternately at Calder and North Edmonton, commencing October 17. It will arrive at Calder on Fridays and leave for North Edmonton on Wednesdays. Visitors may inspect the car Friday, Saturday and during next week, including Thanksgiving Day.

Panama President Flees In Secrecy

PANAMA, Panama, Oct. 9 (AP)—Panama's reputedly Nazi-minded president, Dr. Arnulfo Arias, has fled the country and the mayor of Panama, Nicholas Arditio Barletta, regarded as the strongest man of his administration, has been arrested in a shift of the executive power.

So secretly did Arias flee by airplane at 5:30 a.m. Tuesday that his departure was not revealed until a successor was sworn in this morning.

Neither his motives for leaving the country nor events leading up to the sudden development were clear but the country was quiet.

The Supreme Court of Panama today swore in Ernesto Tenorio Guardia, second vice-president of Panama, who is reported to favor collaboration with the United States, as acting head of the government.

Neither his motives for leaving the country nor events leading up to the sudden development were clear but the country was quiet.

The Supreme Court of Panama today swore in Ernesto Tenorio Guardia, second vice-president of Panama, who is reported to favor collaboration with the United States, as acting head of the government.

WASHINGTON, Oct. 9 (AP)—President Roosevelt, asserting it was time for the United States to "stop playing into Hitler's hands, and to unshackle our own," urged congress today to revise the neutrality act and permit the arming of American merchant vessels.

In a special message he also told the house open for further revision later in spite out another

Test of President Roosevelt's "stern message" in Congress will be found on Page 11.

Major prohibition, that of preventing United States cargo ships to travel to belligerent ports.

Saying that Hitler "has offered a challenge which we Americans can not and will not tolerate," the president said:

"We will not let Hitler preclude the waters of the world on which our ships may travel. The American flag is the flag of international freedom in the light of international law."

"We intend to maintain the neutrality of our country," the president said.

To MAINTAIN HONOR

"We can not permit the affirmation of our rights to be annulled and diluted by sections of the neutrality act, which have been in the light of international law."

"We intend to maintain the neutrality of our country," the president said.

We intend to maintain the neutrality of our country, the president said.

"We intend to maintain the neutrality of our country," the president said.

President Flees

President Arnulfo Arias, of Panama, above, fled his country by airplane Tuesday in such secrecy that his departure was not made known until today when a successor was sworn in. He is now in Cuba.

Decision Now Near Say Huns

By The Canadian Press

The German army, driving toward Moscow in what Hitler described as "the last great, decisive battle of this year," was claimed by the Germans today to have broken through Russia's power to resist, with 60 to 70 Red army divisions caught in two vast traps west of the Soviet capital.

Normally, 60 to 70 divisions would total approximately 1,000,000 troops, but a Nazi spokesman said some of the shattered Red units consisted only of some hundreds of men.

Hitler's chief declared that the Soviet Union is militarily finished, "for lack of food, fuel, and the 110-day old war on the eastern front was all but decided."

Germans claim that Russia was "finished" on the eighth day of the new offensive against Moscow.

The sensational claim, which was not elaborated by any details of specific land gains, came from Dr. Dietrich Klagge, a German official in Berlin, after Hitler's eastern front headquarters.

"From the springs of the Volga to the Sea of Azov," he asserted, "remains only Soviet armor, where are in retreat."

The Red army is severely reeling the onslaught. Soviet newspapers spoke of the "German offensive against Moscow."

Further Slash In Gas Use May Be Necessary

NIAGARA FALLS, Ont., Oct. 9 (CP)—G. R. Cottrill, Canada's oil controller, warned today that "we must go on and prepare for a more serious situation than we have yet had to meet" when he addressed the Canadian Good Roads Association.

His carry on the way it is necessary to make a 10 per cent cut in gasoline consumption throughout the Dominion—about 100,000,000 gallons, taken out of non-essential consumption, he said.

"Whether a 10 per cent cut is sufficient to meet the situation is a very serious question," he continued. "We do not know what the outcome in southern Russia."

He said that the Russians depended on the oil from the Caucasus for their supplies and that if this oil field passed into the control of the Hun, whether it was destroyed in advance or not, Russia, in fact, would have to give up the war.

He said that the Russians depended on the oil from the Caucasus for their supplies and that if this oil field passed into the control of the Hun, whether it was destroyed in advance or not, Russia, in fact, would have to give up the war.

TANKER SHORTAGE

But wherever it came from, Mr. Cottrill said, "it must come from the same source as the oil from the Caucasus."

TWO MISSIONS CONFIDENT RUSS WILL HOLD OUT

SOMEWHERE IN BRITAIN, Oct. 9 (CP)—Members of the United States and British missions just returned from Russia expressed confidence tonight that Moscow would hold out against the present Nazi offensive.

One United States official said that even if the Soviet capital fell—which he seriously doubted—Russia would continue the fight.

Nazi Publication Of Letter Mystery

WASHINGTON, Oct. 9 (AP)—The White House shared public opinion today on how the German government learned what was in a letter President Roosevelt sent Premier Stalin, promising Russia aid in a letter.

Early said the United States government did not know how it happened generally in Moscow since it is the Germans tried to make of the letter.

The published German version had the salutation and conclusion in friendly phrases.

Early said there was no reason why the letter should not have been released generally in Moscow since it is not regarded here as "confidential."

Nazi Reprisals Being Continued

British Official Press

The Nazi reprisals against the rescued occupied nations of Europe continue.

The official German News Agency admits from Prague that nine more Czechs have been executed since the attack on the city.

It makes a total of 23 death sentences at Prague in the past 24 hours.

The Vichy radio, heard in New York, said a report that 100,000 persons have been deported to the Soviet Union, the Axis took over in Yugoslavia.

War Services Act Broadened

OTTAWA, Oct. 9 (CP)—The department of national services announced today amendments to national war services regulations broadening "the powers governing the effective use of manpower for the successful prosecution of the war, in the national interest and the economy of the nation."

The amendments to the regulations, to be effective when they appear in an extra edition of the Canada Gazette which is expected within the next 24 hours, declare that:

"When ruling on applications for postponement for compulsory military training made by any man engaged in a war industry, a seasonal or essential occupation, the board is to take into account the supply of available labor and the importance of the individual man called out for military training to war industry or to the national economy and always in the national interest."

The statement from the department continued on Page 2, Col. 4.

Nazi Tank Forces Beaten In Attacks Near Tobruk Port

CAIRO, Oct. 9 (AP)—German tank forces have been beaten in the upper hand in the No. 10 Land outside Tobruk, British-led Libyan port, but failed. British general headquarters announced today.

Progressives Will Discuss City Election

Formation of a United Front of all progressive groups in Edmonton to place candidates in the field for the November municipal election will be discussed at a meeting to be held, possibly at the Labor Hall, on Thursday, Oct. 10.

Conversations have been progressing between members of progressive groups in the city to place candidates in the field for the November municipal election.

The United Progressive group, which was formed in the city, is now in the process of organizing a campaign to place candidates in the field.

The group is now in the process of organizing a campaign to place candidates in the field.

Restrict Publicity Regarding R.C.A.F. Women's Auxiliary

Edmonton Bulletin Ottawa Bureau

OTTAWA, Oct. 9 (AP)—The R.C.A.F. Women's Auxiliary has decided for the present to restrict publicity regarding the new women's auxiliary, it was indicated today.

Telegrams have been sent to 150 women recruits, a number of them from each military district, to report to the nearest R.C.A.F. office for a five weeks course starting October 23.

Air force authorities decided today not to release names of recruits that have been accepted, some of whom may fail to pay the course. Recruiting for women's auxiliary groups has been discontinued. It is reported, but efforts to obtain a change of policy on publicity has been refused.

Hanson Returns

MONTREAL, Oct. 9 (CP)—Rev. H. B. Hanson, Conservative House leader, and a party of his House of Commons colleagues have arrived here after a Royal Air Force ferry bomber flight from the United Kingdom.

Greatest Chinese Offensive Starts

SHANGHAI, Oct. 9 (AP)—The greatest offensive of the Chinese army in 4 1/2 years of warfare is apparently under way, Japanese army sources said today.

They reported 80,000 Chinese troops, attacking Japanese forces Oct. 2, in the central China and said fighting remained in progress north, east and south of Japanese-held Hankow, Yangtze river port.

Japanese said the principal Chinese force, which Generalissimo Chiang Kai-shek ordered equipped, it was acknowledged a Chinese division had occupied some 100 miles of territory.

Japanese claimed they later reported those positions, with Chinese forces of 200,000 and 198,000 men, were pronounced a Chinese victory in an engagement northwest of Hankow, where pronounced aerial activity was reported. Dense news agency claimed, Chinese divisions (perhaps 45,000 men) had been sighted near Nanking and that fighting was going on.

Windsors Speed Across Prairies

OTTAWA, Oct. 9 (CP)—Lord and Lady Windsor, who are on the Duke and Duchess of Windsor, left by train across the Canadian Prairies, en route home to the Bahamas.

The Duke and Duchess left today at 10:30 a.m. from Regina, and will arrive in the Bahamas tomorrow.

The Duke and Duchess are expected to arrive in the Bahamas tomorrow.

RUSSIA MUST HOLD REMAINING INDUSTRIAL AREAS

Soviet Resistance to be Sustained On Major Scale

Observers Point Out That Russ Productive Capacity Still Is High

By A. T. STEELE
MOSCOW, Oct. 8. (CPN)—So long as Russia can hold her remaining industrial areas there is every reason to believe that Soviet resistance can be sustained on a major scale. This summarizes the opinions expressed to your correspondent by several American experts who attended the three-power meetings here. They point out that despite losses to the Germans Russian productive capacity is still very high. Moreover, it will be rounded out by materials now pledged by the United States and Great Britain plus wartime increases in output.

British Attack On European Coast Unlikely

Continued From Page One
in 1940 were able to take their paratroops to the German coast would spot concentrations of shipping and send bombers over to blast them.

This prospect of heavy losses to the Allied merchant fleet, which officials have estimated already is so small as to be considered by many to be a negligible factor in the British campaign against Germany.

London newspaper commentaries also say they expect that the loss of Russia's main arm to be decided within two or three weeks. They agree that the British are aware of the fact that the loss of Russia's main arm to be decided within two or three weeks.

Windsors Given Happy Farewell By Calgarians

CALGARY, Oct. 8. (CP)—An excited, enthusiastic crowd of nearly 2000 Calgarians, alternating singing "For He's a Jolly Good Fellow," "Home On the Range," and "There'll Always Be an England," cheering and crying, gathered in the rear of the train off at 8:15 M.T. Wednesday night.

Rumanian Oil To Be Sent France

VICHY, Oct. 8. (AP)—Foreign ministry officials said today they expect Rumania to begin shortly overland deliveries of 12,000 tons of oil monthly to France under the terms of a trade treaty announced Oct. 3. The oil is to pay off a Rumanian debt of approximately 1,000,000 francs (approximately \$1,000,000) to France.

NIPPONESE MASS TROOPS IN IND-CHINA

Four Routes By Which Japanese Could Attack Thailand

Siamese Forces Inferior Unless British Soldiers Are Rushed To Their Aid

By LELAND STOWE
BANGKOK.—(By Clipper)—(CDN)—There are three overland arteries and one sea route by which the Japanese could attack Thailand from Indo-China, where they have now massed over 50,000 troops plus large air and naval squadrons.

To oppose these steadily increasing forces the Thais have an army of 40,000, an air force of about 100 planes and a navy consisting of 30 gunboats and a very outmoded submarine. In the air and on the sea the Thais are hopelessly inferior—unless British, or British and American, forces should speed to their assistance. On the

Leland Stowe ground, especially while the heavy rains persist, they might be able to ward off Nipponese invaders some sharp embarrassment for a while.

Wealthy Woman Interested In U.S. Espionage

NEW YORK, Oct. 8.—(AP)—A mysterious, wealthy woman who wanted to finance German agents in the United States was mentioned guardedly Wednesday at the Brooklyn federal court trial of a man charged with espionage.

Neither government nor defense attorneys showed any inclination to identify her, beyond a statement that she was born in Germany and was the widow of an American manufacturer.

William Friedman, agent of the Federal Bureau of Investigation, relating a conversation which he said he had overheard between William Sebald, American counter-espionage agent, and Franz Joseph Sliger, a defendant in the Sebald case last May 23, testified: "Sliger said he had met a wealthy German woman who could be of help. He said she would be the widow of an American manufacturer, that her home was in Cuba and that she could render financial assistance, if called upon."

The agent said that Sliger, who is a naturalized citizen, and the chief based aboard the United States liner America, had advised Sebald that the United States air bases had been opened at St. Thomas that the United States was building 30 small vessels, each armed with two aircraft cannons, and that Puerto Rico would be facilities for a fleet of mosquito boats.

Saw Thousands Of Drowning Germans

HAMILTON, Ont., Oct. 8.—(CP)—Fred Knowles, a British marine visiting here while waiting for his ship to be repaired in a United States port, told Wednesday of seeing thousands of dead, wounded and drowning German sailors and soldiers struggling in the heavy seas of Crete.

He said his ship encountered a German and Italian convoy. "It was made up of about seven or eight ships," he said, "and we got in and got very lucky. The sea was filled with air or seven thousand German sailors and soldiers. We couldn't do a thing to help as we were afraid of air attacks and planes. I doubt if many lived."

Men Are Rescued

VANCOUVER, Oct. 8.—(CP)—Francis Miller, president of Francis Miller and Company, Ltd., said Wednesday night that three men reported missing early yesterday from the Seino boat Great Northern 5 off Campbell River, B.C., had been picked up by the Eiva M, Vancouver fish packer.

Japan Prepares For Fire Bombs If War Breaks

By JOE DYMAN

TOKYO, Oct. 8.—(AP)—Every able-bodied Japanese will be expected to take part in the preparation of fire bombs should war break.

They are fully aware of the vulnerability of their industrial cities, built of wooden structures, to destruction by fire.

They reason, too, that enemy bombers would be more apt to carry fire bombs because the fuel required to reach Japan and return to an enemy base would probably limit the load of explosive bombs to perhaps 10-100 lbs. (20-200 pounds) per plane.

Such bombs might frighten the people, the board of information says, but the toll of human lives would be small.

NEW SUBTILES

So the emphasis now has veered away from planning civilian aid to instructing each man and woman to take part in the preparation of fire bombs should war break.

Defence authorities, about to conduct the annual air raid defence manoeuvres, are concentrating on the problem of fighting flames. The annual 10-day manoeuvres will begin Oct. 10.

Women play a large role in these precautions—first, because of a shortage of manpower; second, because residential districts are largely under feminine direction most of the time.

So, in the manoeuvres, one will see lines of girls and women in kind of trousers worn over their skirts, or kind of trousers with a skirt of hand, darting toward the flames under direction of male leaders.

Hold Everything

"He says he doesn't have to take orders from us any more—he bought a defence bond and that makes him a stockholder."

British Perfect Secret Torpedo

WASHINGTON, Oct. 9.—(AP)—Great Britain has developed a highly secret, new type torpedo which will be manufactured in the United States with money from the second lease-lend fund.

Details about the new underwater projectile are carefully guarded, but its manufacture will require special protective facilities.

Bear Admiral W. H. P. Blandy, chief of the bureau of ordnance, gave a house appropriations subcommittee some information about the new torpedo, but declined to be asked a question.

Although there has been no hint as to how the secret new torpedo would differ from those already in use, naval officials long have talked of the need for torpedoes which would be invulnerable when fired—i.e., which would not leave the wake of tell-tale air bubbles which sometimes give surface ships contact warning to enable them to manœuvre out of the way.

Some naval authorities, warning against under-estimating the German U-boat menace, because of the recent decline in ship sinkings, have suggested that the U-boat may have developed a long-range torpedo that eliminates those objectionable features.

Disclosure of the order for the new British torpedo together with indication that it differs widely from those now in use led to conjecture that the British, too, may have solved those problems.

In effect, the army governing managers—or those who willful themselves for training by means of the regulations or production diseases, now are made applicable to all persons coming under the National War Service regulations.

Penalties are provided for any person concerned in the administration of the regulations who accepts bribes or gifts to grant a postponement of military training or issues a certificate of physical or medical unfitness.

The penalty is a fine not exceeding \$5,000 and not less than \$100 or imprisonment for a term not exceeding five years and not less than six months, or both the fine and imprisonment, and in default of payment of fine is a further imprisonment.

For convenience, it now may be said that the age class of men will be the year in which he was born. To avoid delay, the minister has power to appoint a number to be used in lieu of the actual age of the man.

Under the previous regulations, it was necessary to notify a man selected for military service by registered mail. This is now broadened to make personal service legal.

The right of employers or dependents of men called up to support an application for postponement now is definitely established. The application must be filed within eight clear days of the notice to appear for examination.

To speed examination of persons found temporarily unfit previously, it now is provided that the divisional registrar may designate any examining physician. This is considered quicker and cheaper than the practice of having all men re-examined by a medical review board which will continue to be used, however, in cases where a doubt may arise as to the accuracy of the first medical examination.

The contents of 18 men 2222 can be held in an ostrich egg shell.

Men called up under the National Mobilization Act are given the same employment protection now as was extended to men active service by order-in-council 228 last June which guaranteed them their jobs back or employment of equal value to that which they left when they started training.

Regulations similar to those long

Britain Gains Upper Hand In North Atlantic

By WILLIAM R. SPER

WASHINGTON, Oct. 8.—(AP)—Indications multiplied Wednesday that Britain is gaining the upper hand in the vital battle of the Atlantic—task in which we are now receiving most valuable American aid.

Seemingly whatever naval measures have been taken against the German submarines and air planes attacking the Atlantic supply routes between the United States and the British Isles, but the result is apparent from recent developments.

In fact Lord Woolton, British minister of food, told the House of Lords in London Wednesday in no uncertain terms that "we have been getting the better of the enemy in the Atlantic—task in which we are now receiving most valuable American aid."

That was not meant to be said, by the fact that Britain now holds reserves of bulky commodities such as wheat and sugar, but the result is apparent from recent developments.

Supplies move safely. Likewise Harry Hopkins, lend-lease coordinator, was reported to have told the conference of congressional leaders at the White House concerning recent developments.

United States neutrality act, that on the whole supplies from his country were reaching Britain at a rapid rate. Significance was seen in the reduction of war risk insurance rates on British and Allied cargoes by the American marine insurance underwriters, and Interior Secretary Ickes announced that "due to greatly diminished sinkings," British naval losses had been reduced to a minimum.

Leaders In Exile Send Messages To Their Countrymen

LONDON, Oct. 8.—(CP)—Leaders of three national groups opposing the war alongside British broadcast messages of encouragement.

Correspondents reported that Prime Minister Winston Churchill, of the Greek government-in-exile, said that Greece will emerge "nationally stronger and economically reinforced" from the conflict and said his country would be able to recover quickly from its wounds.

A brief message from Gen. Charles De Gaulle, leader of the Free French movement, expressed confidence in Allied victory.

Hubert Pieris, prime minister of the Belgian government-in-exile, said the "steadily mounting execution in occupied countries are the most striking demonstration of the hopelessness of (Axis) collaboration."

Federal Aid To Park Roads May Be Considered

SAGINAW FILES, Oct. 8.—(AP)—"Re-visit of federal assistance to the provinces in construction of improved highways to national parks merits careful consideration as a post-war policy."

Mr. Wattle, director of the surveys and engineering branch of the federal department of mines and resources, said in a paper prepared for delivery today in the 30th annual convention of the Canadian Road Builders' Association.

A paper by M. A. Lyons, deputy minister and highway commissioner for Manitoba, also dealt with post-war highway plans.

Mr. Wattle said the financial burden of Canada's war effort had necessitated drastic cuts in public works, but that the government was now in a position to consider post-war highway plans.

In the post-war period Canada will have along competition with European countries in tourist travel from the Americas, and further development of our tourist highways will be necessary to meet this demand.

Mr. Lyons urged immediate launching of highway development plans, but that the government plan should be worked out at once by the provinces and the federal government.

With 25,000,000 passenger cars registered in the United States it was evident that Canada was only in the early stages of developing its tourist traffic.

Mr. Lyons urged immediate launching of highway development plans, but that the government plan should be worked out at once by the provinces and the federal government.

"How this work is to be financed will be one of the problems which will arise in the post-war period. Most must await its solution."

More than 10,000,000 miles of highway stretch over the earth's surface.

WESTERN CONFERENCE PRODDED FOR DECISION

Juniors Start Without Confirmation Of Guarantees

Here's Play That Broke Dodger Hearts

Paste this one in your scrap book, for the "it" boys of the Hot Stove will be jawing about it all winter long—and for many a winter to come. It's a picture of the most miraculous break in world's series history—the beginning of the fantastic end of the fourth game between the Yankees and Dodgers at Ebbets Field. Umpire Goetz left, called Yankee Henrich "out" on strikes. The unfortunate catcher Mickey Owen is wheeling, tearing off his mask, to chase the ball he dropped. Henrich, not out after all, starts his dash to first. After that—the deluge of hits and runs that gave the Yankees their "gift" victory of 7-4.

Prairie Playoffs Hang In Balance

CALGARY, Oct. 9.—(CP)—Pending word from the secretary of the Western Football Conference confirming reports that the organization will finance western junior football playdowns this fall, Vere Carmichael, Calgary sportsman who is in charge of the semi-finals and finals, has been unable to make definite arrangements.

Porter Case To Come Up Again

OTTAWA, Oct. 9.—(CP)—James McCaffrey, president of the Eastern Rugby Football Union, said Wednesday night he has received a letter from President Al. Bon of the Toronto Balmy Beach Football club asking that the status of Bobby Porter, Beach quarterback, be reconsidered by the league's executive committee.

McCaffrey said Bon has decided to withdraw an appeal which the Beach club lodged with the Board of Governors last week. The league president said he would discuss Bon's letter with members of the six-man executive committee of the union.

Reardon, McGill On Way East For Hockey Workouts

CALGARY, Oct. 9.—(CP)—Well-known hockey players were on Wednesday night's east bound train en route to pro hockey club training camps. Reardon, McGill, and other players were on the train. Reardon, who made good with Montreal Canadiens last winter, his first season in pro hockey, is en route to St. Louis, Mo. McGill, returned \$1000 for \$2 and was clocked in 1:50.1 on a slow track. Third went to Mr. Smith.

Jockey Has 53 Winners At Meet

CHICAGO, Oct. 9.—(AP)—With three days of the 30-day meeting still to come, Jockey Steve Brooks has won his string of winners at Hawthorne Park to 53 Wednesday by leading home the winning mounts in three of the first five races. But the Chicago track's pacer-setter missed out in the main event, the mile and a sixteenth Ullman Purse. Abroad the 3-5 favorite, Goshen, Brooks gave up his charge, a typical whipping race in the stretch but wound up three-quarters of a length ahead of Mrs. L. P. Thompson. The later, ridden by N. L. Herron, returned \$1000 for \$2 and was clocked in 1:50.1 on a slow track. Third went to Mr. Smith.

Shore Refuses Any Information

PORT ARTHUR, Oct. 9.—(CP)—Edna Shore, manager of Springfield Indians of the American Hockey League, is eager to publish the news in Springfield but apparently doesn't care whether the general public knows the Indians are a hockey club and not a moving band of North American natives. Shore, putting Indians through pre-season training here, refused to give out information to the Canadian Press except on condition it be withheld from other papers until after it had been sent to the Springfield newspapers.

Bud Foley Away

Bud Foley, last year's coach of the E.A.C. juniors and a member of the U.S.A. Golden Bears football club, will leave shortly to play for Elmer Price's Baltimore Orioles in the Eastern United States League. Bud spent the summer with a road construction crew, and returned this week from Grande Prairie, a complete arrangement for his trip to the U.S.

Looking them Over

THE more you see of the work of Ducks Unlimited, the more convinced you become that here is the finest example of what can be achieved by co-operation and the drawing up of a far-sighted program. Ducks Unlimited has just let the contract for a new reinforced concrete dam on the Pas River, right within the limits of the city of the Pas. It will cost \$75,000 and is being financed jointly by the province of Manitoba and Ducks Unlimited. When completed, it will be turned over to the Manitoba government for operation and maintenance.

This dam will normally hold a 12-foot head of water that will flood some 27,000 acres of the Pasquia marshes on the upper delta of the Saskatchewan River and will make a nesting area of 50,000 acres available for waterfowl.

These Pasquia marshes are dry now except in the early spring when the snow waters from the Pasquia Hills fill them. However, these spring waters drain away through the Pasquia River in a short time, leaving muddy marsh area that is good for nothing except breeding mosquitoes—neither ducks nor any other land.

Here is where the value of foresight and co-operation comes in. The funds of Ducks Unlimited are sacrificed by duck hunters in the United States who realize that to get more ducks, they have to provide more and better breeding areas up here in the Canadian northwest where the bulk of North American ducks nest.

Took Co-operative Angle NOW most sports organizations under such circumstances would have been inclined to have a "let's get it over with" attitude. They would think only in terms of more ducks—not of how they might make their undertakings serve two or three other useful purposes.

Ducks Unlimited took a different slant. They said, let us produce more ducks first of all, but at the same time let us arrange our program so that it will be a benefit to the surrounding country as well as the hunters south of the border. If we can figure out ways by which we produce more ducks and at the same time help agriculture, game sites and the whole province, why then let us mean it all the way.

The new Pasquia dam will be a fine example of this kind of co-operation. A bridge has been needed over the Pasquia for some time. Ducks Unlimited and the Manitoba government got together and the plans were made. A dam will be built up the river, and at the same time the original object of more duck nesting ground will be achieved.

Furthermore, we Canadians should gratefully remember that all the money for projects of Ducks Unlimited is an outright gift from our neighbors south of the border.

It's Worth Thinking Over THE example being set by Ducks Unlimited is one that every sports organization, public and provincial government body could gain a little serious thought to.

Generally speaking, our capital expenditures in sport are based on some immediate need or fancy with little or no thought given to their use in or with other projects on a long term plan.

Here in Edmonton a good many thousands of dollars are being poured out on two outdoor rings that will be scrapped in under a year or two. Varsity paid something like \$2,000 on an outdoor rink last winter when it covered one which was taken over for army drills. Few of the students feel they get any satisfaction out of it and there is a possibility that it may not be even set up this winter. The same project is the same risk the city is taking up in the Kingsway artificial park to replace the Arena taken over for the air force.

New law is the law and risk is the risk. Enough money has been tossed away on these two outdoor projects to provide a start on a modest covered arena in some central, up-town location. An arena that would last 50 years, be a money maker and satisfy all. Lack of co-operation and the lack of willingness to set a lot of silly red tape are the reasons this miserable waste of cash is going down the drain pipe.

Had the city been the least called for a co-operative venture by all parties interested and started the ball rolling with as much money as it will spend on the Kingsway rink, the chances are that Edmonton would enjoy hockey this winter in a fine new arena.

South Side Tackles Leafs In Playoff Final Tomorrow

Championship of the City Junior Football League for the 1941 season will be definitely settled at Clarke Stadium on Friday night when South Side Spartans and Maple Leafs meet in the final of their two-game series. The game starts at 8:30 p.m.

Three Veterans Of Americans Not Asked To Report

PORT ARTHUR, Oct. 9.—(CP)—Three veterans of New York American National Hockey League team, Charlie Cochrane, Hooley Smith and Johnny Sorrell, were not among the 14 players reporting for the opening American training camp here Wednesday and Manager Red Dutton said he is trying to arrange a deal for the three men.

Dutton refused further comment on status of the three veterans, all of whom transferred to American in recent years after playing their peak with other N.H.L. clubs. Cochrane was a good right-winger with Toronto Maple Leafs. Hooley Smith a centre with Montreal Maroons and Sorrell a right-winger with Detroit Red Wings.

Only other members of last season's American missing from the camp is winger Sarge Allen, a forward last year. Dutton and Allen have been told but have not decided.

Players reporting yesterday were Mel Hill, left-winger, purchased from Boston Bruins; goalkeeper Earl Robertson and Charlie Bayne, defencemen; Pat McIndoe, Pat Egan and Will Field, and forwards Harvey Jackson, Bob Weir, Tommie Anderson, Murray Armstrong, Buzz Bell, Lorne Carr, Billy Bennett and Norman Larson.

American Hockey Loop Opens Oct. 29

NEW HAVEN, Conn., Oct. 9.—(AP)—The American Hockey League, 1941-42 schedule, which opens Oct. 29, was announced Wednesday by President Maurice Podoloff.

In the inaugural games, Pittsburgh travels to Cleveland, Providence goes to New Haven and Indianapolis visits Springfield. The following night, Providence plays host to New Haven, and Indianapolis opens Washington's campaign.

Washington, a new entry, helps Philadelphia get its home start on Nov. 1. On the same night Indianapolis will play at Pittsburgh, and New Haven at Hartford.

After a belated start, Washington and Philadelphia open their campaigns, Indianapolis finally goes into its own rink on Nov. 2 with Pittsburgh, Cleveland will be Buffalo's first home for the season.

The season will end March 15.

Army Day For Ottawa Game

OTTAWA, Oct. 9.—(CP)—Officials of the Ottawa Football Club announced Wednesday that next Saturday will be "Army Day" in the capital's football life and that 1,500 troops will be invited to Ottawa and at nearby Combermere range will be permitted to go to the club to see Rough Riders' game with Toronto Balmy Beach.

The Ottawa general manager of the club said the 42-year-old player had been offered a job at each with the Los Angeles team of the Pacific Coast League.

Maryland Will Probe Practice Of De-Nerving Horses

LAUREL, Md., Oct. 9.—(AP)—The Maryland racing commission is investigating the practice of de-nerving thoroughbreds, Chicago's Chester F. Hockley has disclosed. The investigation was prompted by the case of the pacer Meadow Moon, destroyed by the humane society of Baltimore county. A humane society leader reported that a hoof and leg of the horse were de-nerved, apparently through de-nerving.

De-nerving is the practice of severs nerves in the leg of a horse, thus enabling them to run without feeling pain. Infection and decay usually occur in the "dead" leg following such an operation.

Pending an investigation, the case of Meadow Moon, the racing commission ordered the tracks to stop all further entries of horses trained by Joe Simon of Baltimore.

Doc Rommes To Coach In Hockey

HOUGHTON, Mich., Oct. 9.—(AP)—Edwin (Doc) Rommes will play centre for Chicago Black Hawks on the Stanley Cup championship team, will coach the Michigan Tech hockey team here next winter.

The 32-year-old Rommes, who spent nearly a decade with the Black Hawks but also played in the National Hockey League with Toronto Maple Leafs and New York Americans, has agreed to return to coach the Engineers, one of the former college hockey squads in the Midwest. Rommes ended his playing career with the American Red Cross.

BUY SOMETHING BRITISH

LINES EVENT MATCHED

The Spiffins and Leaf lines are even evenly matched in fact both clubs are exceptionally strong defences, might gain ground from the fact that in Monday's game, the winners were only able to gain yards for time. Spiffins moved the yardstick on just time occasion.

In addition both clubs are fortunate in having some very excellent tacklers. Lawrence and Kinross for the Leafs and Bayner and Duncan for the Spiffins are consistently good and there are others who are also dynamic in that respect.

TO PLAY CALGARY

The winner of the Edmonton playoffs will meet the Calgary title holder in a series for provincial honors. The first game is to be played here Oct. 18, with the return at Calgary, Oct. 25.

Don Houghton's North End Bulldogs and Willie End Thorburn of the Spiffins are the two players in the southern city and they start their two-game playoff series for the title to meet the Remington winners on Friday night. Their second game is on Thanksgiving Day.

MATERIAL AID TO JOBLESS HALVED

Alberta Relief Costs Shrink With New Employment

Province's Expenditure
Reduced By \$2153,191
For Latest Fiscal Year

Reflecting improved material and economic conditions and greater opportunities for gainful employment, total cost of unemployment relief to all authorities in this province for the fiscal year ended March 31 last, showed a decrease of \$2,153,191.85 in comparison with the previous year, according to figures made available by Hon. Solon E. Low, provincial treasurer, through the public accounts for the period mentioned.

Total unemployment relief costs in this province for the year ended March 31, 1940, were \$2,153,191.85, or 61.05 per cent of the total cost of \$3,506,383.70 for the year ended March 31, 1941. The total cost was \$2,232,821.31, showing a decrease of \$79,629.46.

The accounts also show that the accumulated cost of relief from Oct. 1, 1940, when it was organized on a systematic basis, to March 31, 1941, was \$2,153,191.85. Of this amount, the provincial government contributed \$2,281,184.70, the Dominion government \$108,076.62 and municipal authorities \$108,076.62.

DIRECT RELIEF
Of the total cost to the province in the fiscal year ended March 31, 1941, the provincial government contributed \$2,084,138.61, the Dominion government \$207,589.92 and municipal authorities \$108,076.62.

Direct relief represented an expenditure of \$1,458,000.00, or 65.3 per cent of the total cost of \$2,232,821.31. The remainder of \$778,821.31 was accounted for by the indirect cost of relief.

The material of direct relief, which included \$1,458,000.00, was divided into three main categories: (1) relief for the unemployed, (2) relief for the disabled, and (3) relief for the aged. The total cost of direct relief for the unemployed was \$1,158,000.00, for the disabled \$1,158,000.00, and for the aged \$1,158,000.00.

TOTAL EXPENDITURE
Re-establishment and training of young people cost \$200,472.30, or 13.7 per cent of the total cost of \$1,458,000.00. The remainder of \$1,257,527.70 was accounted for by the cost of relief for the unemployed, disabled, and aged.

Relief work took a total of \$14,267,075.00, of which the province contributed \$7,000,000.00, the Dominion \$7,000,000.00, and municipal authorities \$14,267,075.00.

ALTERNATE RELIEF
In addition to unemployment relief during the fiscal year ended March 31 last, there was agricultural relief given to the unemployed, which cost \$1,158,000.00, or 7.9 per cent of the total cost of \$1,458,000.00.

Queen's Canadian Fund Is Swelled
Edmonton's Queen's Canadian Fund for the period ending October 8, 1941, showed a total of \$21,153,191.85, or 61.05 per cent of the total cost of \$3,506,383.70 for the year ended March 31, 1941.

Two or three years ago, Mr. Blackmore, M.P. for Lethbridge and parliamentary leader of the social Credit-Nationalist forces, was a happy man when he followed the hour of common sense, in caucus, approved his acceptance of the invitation of Prime Minister W. L. Mackenzie King to fly to Great Britain and see conditions there at first hand. While the recent flight across the Atlantic was his first time up for Mr. King, it was his last time up for Mr. Blackmore.

North Recruiting Trips Called Off
Owing to the impossible conditions in the Pacific, North Recruiting trips have been called off. The R.C.A.F. has decided to postpone its recruitment drive in the Pacific, as the war has now gone on for so long that the recruitment drive is no longer feasible.

Military Orders
Veterans' Volunteer Reserve, which is a part of the R.C.M.P., has been ordered to be disbanded. The R.C.M.P. has decided to disband the Veterans' Volunteer Reserve, as it is no longer needed.

Used School Books BOUGHT AND SOLD
We will buy for cash new used school books that are in good condition. We will also buy old school books that are in good condition. We will also buy old school books that are in good condition.

They Planned Mobile Library

Confidence that the new street car library, first of its kind in Canada, would be of great benefit in serving the suburban districts of the city, has been expressed by Ald. A. Blair Patterson, chairman of the Edmonton Library Board, and Hugh C. Gourlay, librarian of the Edmonton Public Libraries.

The board chairman and the librarian, who conceived the idea, have been working hard to bring the plan to fruition. It was felt by Mr. Gourlay that a mobile library would be of greater service than outlying branches.

University Of Alberta Wins Championships In Suffolks, Hampshires

Entries from the University of Alberta took the championships in the Suffolk and Hampshire ram classes at the annual fall sheep and swine show, staged by the Edmonton Exhibition Association in conjunction with the Alberta Sheep and Swine Breeders' Association.

In the Shropshire ram classes, entries from W. R. Cornish, Mannville, took championship and reserve ribbons, while in the Suffolk ram classes, F. J. Beck and Son, Drumheller, took the championship with their Ribblesdale ram, which was owned by W. R. Cornish.

Your Figure, Madame!

By IDA JEAN KAIN

Your circulation is the only fountain of youth you can count on. It is the only thing that will keep you young because it is natural for the end of the day for wearing Smith to get enough exercise. But, first at the time you exercise, it is easiest to sidestep. After light business all have a def-

Vivian Smith, lovely member of the Music Hall ballet corps, illustrates both an exercise and an exercise position that will give your circulation a jolt. Merely standing for the end of the day for wearing Smith to get enough exercise. But, first at the time you exercise, it is easiest to sidestep. After light business all have a def-

20 you have to go out of your way to give your circulation a jolt.

The circulation of blood through the body is what supplies the tissues with oxygen from the lungs and with food from the digestive tract. The point to be made right here is that good circulation also depends on the food materials provided.

The circulation is the means of transporting the waste materials to the elimination system and the rate of speed of this transportation is a fair gauge of the efficiency of your circulation.

All this should make it easily understood why your circulation influences the way you look and feel. It's worth your while to check up on two or three circulation influences. For one thing, you may be impeding the free flow of circulation by wearing very tight garments. Those of you who stand on your feet all day should be par-

McCoy Health Service

When an individual becomes mentally depressed, and sluggish, it is often said that he is "Singing the Blues". The English would say that he is litherly, and very often these mental depressions are caused by a sluggish liver and gall bladder. The liver is a spongy organ which secretes bile, the most digestive agent. When the liver becomes sluggish, the bile secretion is delayed and is stored up in the liver and not sufficient of it is eliminated. Frequent cause of this retention of bile is the stoppage of the bile ducts by catarrhal inflammation, raising a stricture, and very often constipation exists also.

Humors, bile is a light green or golden yellow color and the amount secreted by an individual in health is 24 hours, varying from ten to twenty ounces. The one who is suffering from the blues, due to liver or gall bladder disorders, frequently becomes bilious and the nausea and subsequent vomiting is an endeavor on the part of nature to get rid of the excess bile, after which the patient experiences relief.

The two great factors causing liver and gall bladder sluggishness are, first, poor food combinations, and over-eating, and second, insufficient exercise. It will be noticed that athletes and those who indulge in physical exercise rarely have biliousness, although the liver and gall bladder is occupied in sedentary work and who over-eats, especially on the carbohydrates, fats and proteins, is likely to have frequent attacks.

Nature usually gives some warning signals when the liver and gall bladder become disordered and the skin becomes a yellowish color, the tongue is coated, headaches are frequent and persistent, and there may be diarrhea followed by nausea and vomiting.

Having pointed out one of the foremost causes of the blues, the remedy is obvious. Begin a daily regimen of exercising. Long walks in the open air with deep breathing will bring about splendid results and will prevent the accumulation of excess bile in the liver or gall bladder. The dietary treatment is obvious. Avoid bad mixtures of foods, restrict the sugars, starches, and fats, and during an attack, it is a good plan to go on a fruit fast for a few days, giving the organs a well earned rest.

All questions regarding Health and Diet will be answered. Large, stamped, self-addressed envelope must be enclosed. Write on one side of paper only. Letters not sent unless enclosed. Address: McCoy Health Service, 1151 West 6th St., Los Angeles, Calif.

Animal Crackers

"As near as I can figure it this pile goes to the government."

Bonnie Doon Members.

New Mothers' Club To Pack Duty Bags

Members of the New Mothers' Club, resident in Bonnie Doon, are planning to knit 2 gloves to fill duty bags for sailors on active service on Thursday, October 9 at the home of Mrs. Doon, 2032 91 street from 3 to 4 p.m.

Tea will be served by the ladies of the club, and all members are cordially invited to attend, also any friends interested in sending a little cheer to our sailor boys. All gifts, however small, will be gratefully received.

Suggested items for the gloves are: toilet soap and face cloth, shaving soap and razor blades, handkerchiefs, combs, playing cards, writing pads and envelopes, pens, stationery, or pens in packages. Also, rubber, canned, prepared coffee or cocoa, tooth paste and tooth-brushes, shoe laces and shoe polish, candy or cake in sealed containers.

Moose Women Hold Meeting Of Alumni Chapter Recently

Alumni Chapter No. 2 was marked recently by the Women of the Moose No. 83 when they met in the Moose Temple, 106 street. Alumni chairman, Mrs. T. Carney, expressed the purpose of the Moose-Heart Alumni Association.

Junior Board, Mrs. R. Crawley, gave the sick report. Letters of appreciation were read by War Activities chairman, Mrs. B. Smith. Mrs. M. Green will convene a luncheon sale which will be held at a later date. Appreciation was expressed by members for the donation of Lapland from the Friendly Group to Moose War Activities. Mrs. A. Mitchell will convene the usual tea to be held after the next meeting.

Minute Make-Ups

The dry skin needs moisture and rich feeding cosmetics. Apply a cream, or a rich, creamy cream. Leave on for a minute. Wring out a Turkish towel in hot water. Apply the warm, damp towel to the throat and face. Repeat cream application and moisten. Gently wipe over the skin with a cleansing tissue. Now apply cream rouge and powder. The dry, drawn skin will fairly "bloom" with soft color!

To counteract the constant pull of gravity it is a good plan to take some of your calisthenics to the downhill position. A good exercise is to lie on the side on the four lower arm following the head, both feet straight down, and slowly raise and lower the top leg. Another excellent jogger is the side-swinging both legs from the hip joints, both legs straight down, and swinging both legs from the hip joints simultaneously in opposite directions.

Trade-Training Stands Behind Mechanized Divisions

Army Trades School—The key institution of the great army trades-training program in progress is the Army Trades School, Hamilton, Ont. Above is the elementary machine shop wing of McNaughton Hall, the main school building. Inset, is a student welder.

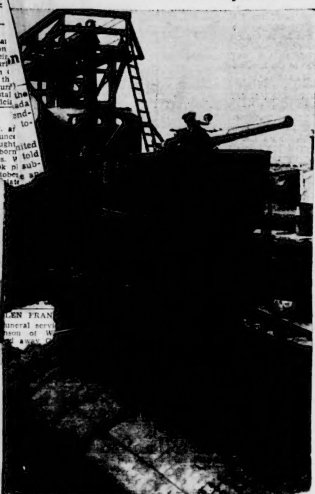

Here is shown the widespread network of army trades-training establishments where recruits are turned into skillful soldier-tradesmen for the highly mechanized Canadian Army.

ARMY TRADE SCHOOLS

British Sub Gets Repairs

This view of the British submarine Pandora, showing its conning tower and gun, was taken at the Portsmouth, N.H., navy yard. The officer is Lieut. Robert Alexander, skipper of the Pandora. The sub is one of the many British vessels of war that have been sent to American shipyards for general overhauling and repair. Also at the Portsmouth yard was the Parthian (a submarine) and the Free French sub Surcouf, world's largest.

White House Callers

Sir Ronald Campbell, left, acting British ambassador to the United States during the absence of Lord Halifax, who returned to the U.S. from England October 1, is shown with Sir Shamshukham Chetty, head of the purchasing mission in India at the White House in Washington. The British mission is the first of its kind since Franklin D. Roosevelt's death.

Drivers, Mechanics Being Turned Out For Dominion's Shock Force

By KIM BEATTIE

When the Battle of France forced the realization that only British armies based on gasoline and speed could defeat Hitler's Wehrmacht, three major factors stood clear as necessities to the officers faced with the tasks of reorganizing and rebuilding the Canadian Army in the midst of war.

One, new tank units plus motorization of infantry, artillery and auxiliary troops in other words complete mechanization behind an armor-plated approach. Two, swift reorganization of the existing training process to incorporate the new tactics. Three, creation of a great host of soldier-technicians, tradesmen and mechanics to operate and maintain the fully mechanized army in the field.

At this writer will not tire of repeating, the three factors combined to produce one of the most appalling prospects ever to confront the field commanders and general staff of a nation in peril. Only time and the calm survey permitted by its distance, will finally reveal the real enormity of the effort necessary to bring the Canadian Army so far on the arduous road to recreation as it is today.

STARTING TO ROLL

Civilian Canada is already aware, however, of tangible extensions of the historic military achievement carried out in the brief months since Lieut.-Gen. A. G. L. McNaughton, the corps commander, and Major-General M. D. G. Crear, the chief of the general staff, could seriously start the retraining process. There is steadily increasing verification in the Canadian camps, training centres, testing grounds and workshops, for the plan that the new equipment is beginning to roll off the assembly lines, out of the arm and heavy-machine factories. Results are also everywhere visible in the interim, the more far-forward detail and staff work, which was necessary to transform the 1940 Canadian Army into a well-drilled, tightly interlocked, war-machine, built upon the new tactics, devices, weapons and formations.

The entire Canadian land-war organization, for instance, both overseas and at home, has been reformed, and is undergoing intensive training to the army plan which is calculated to defeat the mechanized Germans on any battlefield, where we—not Hitler—may choose. The Canadian Corps is constantly practicing air-land cooperation in its maneuvers in England. Tanks are always the spearhead, with powerful motorized infantry driving the "victory" home. In Canada the whole program motivating the army-in-training is based on light tactics and weapons leading to those heavy-scale manoeuvres and thence to action.

NEW CONFIDENCE

Canada is now fully alert to her re-arming of a new, powerful army, even if it is impossible for the public to appreciate the magnitude of the job that underlies it. As our strategic far-seeing plan and intention gradually acquire tangible shape in the direction of many tank units and a completely mechanized army, a new confidence in Canada's future on the battlefield began to grow up to keep pace with the mounting power and state of readiness of her land-arm.

It is a justifiable faith. That the 1942 Canadian shock-trooper will have few peers in the open, hot-biting warfare he will wage is one feature of our martial future about which Canadians can safely be confident.

Further, Canada is now clearly alert to maintaining a modern military organization equipped with the latest weapons and trained fighting vehicles, which will lack extraordinary striking power—despite the fact that the Canadian Army is not a shock force.

fantasy troops of any army in the world. And that does not include the German, British or American Armies.

But what has been almost completely missed in Canada's watchful observation of her army's progress, is the gigantic trades-training structure which has been quietly and steadily erected behind the visible and splendid khaki facade.

MASS OF VEHICLES

As the new army expanded in man-power, the potential mass of vehicles automatically grew with it. Something tremendous and revolutionary in Canadian industrial education had to be quickly organized and launched if trained men were to keep pace with the machines.

This third major factor in the creation of the present army has no more importance than either new type of equipment or tactical training. Just as a million acres of a modern army's success is co-ordination, so is all dependent on the others. All are first requisites. None can be neglected. But the soldier-tradesman is more important to a wheeled army than is any foundation for a structure of steel and concrete. For a mechanized force is not only built on its mechanics, they must operate it in the field, and then maintain it as it rolls. Or it will stop rolling, and nothing is quite so terrible as a bogged-down army, wheeled or any other kind.

MANY SPECIALISTS

When it became clear in the summer of 1940 that the new army would be composed of between 180,000 and 190,000 soldier-tradesmen, that some corps would require more than 500 specialists, and that all would need adequate replacements, it was also clear that the Army would have to create its own. The Directorate of Military Training (Cdn.) J. K. Lawson, Director at Defence Headquarters, Ottawa, immediately prepared to expand its minor trade-training section out of all former recognition. The important organization, which had suddenly mushroomed into existence, was placed in charge of J. H. Col. Spry.

This officer and his staff now stand behind a broad network of army trade-training schools which includes more than 115 military and civilian institutions, exclusive of nearly 40 ordinary military training centres. They are turning-out maintenance men for the infantry, wheeled infantry, truck-and tractor-drawn artillery at an average rate of 2000 a year.

Their task was made more formidable by the fact that the percentage of skilled men who were enlisted in 1940 was not high—not more than 10 per cent. And 180,000 required. Swiftly growing war industries were absorbing almost all surplus skilled labor. In addition, industry was just emerging from a series of years when the training and graduation of apprentices had been at low ebb. Not less than a case of finding men for a few specific trades. There are now 150,000 different types of specialist employed in the new Canadian Army.

BEATIN' THE BLITZ

In an armored division alone, are found the following craftsmen, exclusive of hundreds of drivers, gunners and radio operators—welders, anti-aircraft and instrument mechanic, blacksmiths, bricklayers, concretors, tinmiths, coopersmiths, welders, machinists, masons, plumbers, sawyers, wheelers, carpenters, electricians, and linemen, draughtsmen, surveyors, styrene and electric welders, engine artificers, pharmacists and laboratory assistants, comforters, gunfitters and armorers plus the usual complement of clerks, tailors and cooks.

The great bulk of the demand for skilled men in the new army comes, of course, from the huge mass of about 13,000 vehicles with which the Canadian Army overseas, as constituted at the end of this year, will be equipped. Estimated overseas establishment January 1st, 1942: 11-5 armoured, 2 infantry divisions. The so-called "ordinary" or orthodox infantry-division actually has more vehicles than the armoured formation (4,000 to 3,500), for if the latter has tanks, armoured cars and tank-trailers, the former has many more troop-carrying and general service trucks, artillery tractors, infantry carriers and reconnaissance cars. There are more thousands of headquarters, army and corps troops vehicles. The estimate grows necessary to maintain such an army of fighting and transporting vehicles, all of them under hard usage, can easily be visualized.

CIVILIANS HELP

In meeting the imperative need, the Army has been immensely aided by the provincial departments of Education and the Canadian Youth Training Centres. Without their invaluable co-operation the problem would have proved much greater difficulty. Indeed, the work of establishing, staffing and equipping a widespread series of schools for elementary training was almost entirely taken over by civilian instructors and educationalists.

A total of 96 vocational and technical schools and Youth Training Centres now have well over 3,000 military students attending their classes. No city between Nanaimo and Saint John has one or more elementary army trade-training centre of three months duration, on subjects ranging from how to make face teeth to how to swim a swimmer's side. At Hamilton, Ontario, is the key institution of the entire system. The Army has dubbed it the "Vocational College"—the Army's Trades School—to which the industrial school students graduate. Commanded by Colonel D. A. White, D.S.O., the Trades School operates classes of 3 to 5 months duration according to trade. The syllabus is in the hands of 113 thoroughly qualified instructors, trained educators, who have been assisted by automotive experts and leading educationalists loaned by the Ontario government. Nearly 1,000 youths are in training, and it is certain that a great proportion are also learning a trade which will be a life-long asset.

—By Rick Elmes

will be invaluable in civilian life after applying their knowledge to the mobile army's needs.

ADVANCED TRAINING

Trade-training of the recruit for the army's tanks, carriers, jeeps, armored and reconnaissance cars, troop transporters and tractors, and great armadas of trucks and trailers, does not stop with the civilian technical school and the Army "Vocational College" courses. Even before the soldier-students begin their trade-training, they had already taken two months' instruction in a Basic Training Centre in the fundamentals of soldiering and the army of weapons used by the infantry, and now they go to an advanced training centre of their particular arm. This final phase of instruction is practicing all their particular arm in the trade schools where they learn to use actual army tools on actual army vehicles. Actual technical courses such as Ordnance and Engineers have their experts in senior posts, but the students of the army trade-schools make up the bulk of the mechanical staffs at both forward and rear repair depots and machine shops.

In addition, the ranks of expert army mechanics are swelled by subsidiary advanced courses in industrial establishments and advanced army schools.

INDUSTRIAL CLASSES

Continuous automotive classes are operated for the army in the plants of Ford Motor, Chrysler Corporation, General Motors, International Harvester (13 plants), and LaSalle, and a special infantry carrier course is being given by Ford. A pulp company, a training detail mechanics for the trucks, and nine major construction companies are training army engineers. Nearly 400 officers and men are also in the United States taking tank mechanics, motor vehicle, and mechanical courses.

Two unique schools are also in operation by old branches of the army which have suddenly taken new importance and meaning with the coming of full army mechanization. The Royal Canadian Army Service Corps, which must now feed the army as well as feed it, ensuring that rationing will always arrive up-to-date by operating a driving and maintenance school at Woodstock, Ontario. Trucks and lorries are given a grilling lesson, and the drivers have hair-raising adventures. When they qualify at Woodstock as expert army "wheelers" they can take a truck over terrain and obstacles that would make military truck-drivers shudder.

GREAT DEPENDENCE

The Royal Canadian Ordnance Corps has also stepped into new importance and prominence with mechanization. Almost solidly composed of tradesmen, the Ordnance Corps is operating an advanced detail and mechanic course at London, Ont. Even the freemasons are frequently experienced, patient and graduates, when they proceed to the maintenance units will be able to operate, service, maintain and repair any type of military truck or wheeled vehicle. They will be their corps' mechanical troubleshooters, and trained to provide any possible job in a basic workshop field-hospital repair unit.

It is true that the lads in the jaunty black berets of the Army's Corps have stolen a great share of public popularity because of the spectacular attributes of their trade. But it is the men in the whitened monkey-dresses, the tough and laborious, who seek the greasy tanks and the clatter of the field workshop, who hold the life of a mechanized army in their hands, and who, in the face of the most fearful pits battles in movement, and it is the soldier-tradesmen who must keep their army moving.

Traps For Panzers

Leningrad's pick and shovel crew looks beamishly untroubled as it trowels out tank traps for attacking Nazi panzer divisions. Picture radioed from Moscow.

On The Nose!

Burst of christening champagne on nose of new four-motored Halifax bomber makes splashy picture in England, but is bad news for Berlin and other long-range British raid objectives.

A Horse On The Huns

The mechanized Germans who found the famed Polish cavalry such a soft touch are running into a horse of a different color in Russia. The Soviets claim the Red horse-trousers are getting in telling blows against the invader. New picture shows Russian cavalry thundering to the attack.
